Adama Science and Technology University - Bachelors of Science, Computer Science and Engineering,

The ALX Holberton Software Engineering - Software Engineering,

PROJECTS

WayFinderPlus Admin

A robust platform to manage map data efficiently.

React | JavaScript | MUI | Firebase | Mapbox | Jest

- Developed WayFinderPlus Admin: A powerful management tool for locations, categories, and settings within the WayFinderPlus ecosystem.
- Streamlined location organization, category management, and indoor navigation settings.

WayFinderPlus

All-in-one navigation solution for outdoor travel

React | JavaScript | MUI | Firebase | Mapbox | Jest

- Developed WayFinderPlus: A comprehensive navigation tool for outdoor and indoor travel.
- Integrated turn-by-turn directions, real-time traffic updates, and route customization.
- Created user-friendly interfaces

WayFinderPlus VR

Immersive Indoor Navigation Solution

JavaScript | SCSS | Firebase | pananullem JS | Webpack

- Developed WayFinderPlus VR: An immersive indoor navigation solution using panoramic images.
- Provided seamless exploration of indoor spaces with interactive hotspots.
- Enhanced navigation experience with realistic 360-degree views.

Portfolio Websites

Online Portfolio Showcase Platform

React | JavaScript | Tailwind | Flamer Motion

- Created three distinct free-to-use portfolio websites, catering to designers, developers, and artists.
- Designed customizable templates for users to showcase their projects, skills, and accomplishments.
- Implemented user-friendly interfaces and seamless navigation for a hassle-free portfolio experience.

Simple Notes

Effortless Note Organization Platform

React | JavaScript | MUI | Localstorage

- Developed Simple Notes: An intuitive note-taking website.
- Designed user-friendly interface.
- Organized notes with categories.

EXPERIENCE

Front-End Engineer | at Marakisoft Technologies

Jun 2021 - Sep 2021

Single page e-commerce website

React | JavaScript | MUI | Firebase | Jest

- Collaborated with front-end team to create Figma wireframes and meet client expectations.
- Contributed to software development best practices and utilized proven patterns for extensibility.
- Translated technical concepts into understandable terms for non-technical audiences.
- Designed user-friendly interfaces and implemented quality-enhancing measures like unit testing.

Sales and On-boarding Specialist | at Hello Cash

Jun 2018 - Aug 2018

Online payment system

- Utilized strong communication skills to effectively convey the benefits and features of HelloCash's online payment system to potential customers.
- Actively participated in acquiring new users and contributed to driving the sales process for the company.
- Developed a deep understanding of HelloCash's services, allowing me to communicate complex information in a clear and concise manner to non-technical individuals.
- Researched and explored alternative solutions to address customer needs, ensuring the best approach was implemented.
